Similarities and differences

All ToxRat variants offer the same package of statistical methods and procedures. All ToxRat variants meet GLP requirements, include a validation document, and produce a comprehensive report of the results.

The different ToxRat variants differ in the type and scope of data templates delivered with the software.
ToxRat Professional and ToxRat Monitor include complete templates for various bioassays and allow their automatic evaluation with one button click.
ToxRat Standard provides only general data entry templates without reference to a specific guideline.

The different ToxRat variants thus offer different levels of comfort.

Matrix program features

	TRPro	TRMon	TRStd
Statistical methods as listed on page "statistics"	+	+	+
NOEC determination	+	+	+
ECx determination	+	+	+
validation document	+	+	+
automatical report generation	+	+	+
manual evaluation of single variables	+	+	+
calculation of variables such as yield, growth rate etc. from raw data	+	+	-
check of biotest specific validity criteria	+	+	-
automatical evaluation of complete biotets according to	+	+	-
- DIN EN ISO	+	+	-
- OECD	+	-	-
- IOBC	+	-	-
- OCSPP	+	-	-

TR Pro = ToxRat Professional, TR Std = ToxRat Standard, TR Mon = ToxRat Monitor

The matching solution for any requirement.

Requirements can change over time. ToxRat can grow and change with them.
If the range of your required evaluation templates has changed, simply extend your existing ToxRat license.
That' s possible.
